

THE WORLD OVER

PONOKA MILL WILL BE BUILT

Mrs. Edith Rogers, Ponoka, M.L.A., late Wednesday confirmed a report of a company of which she is president, had been formed to conduct woolen goods manufacturing at Ponoka and that the \$50,000 company was granted incorporation at Edmonton during the day.

Mrs. Rogers, in a long distance telephone conversation with the Alberta from Edmonton said the company holds an option to purchase a site with suitable building at Ponoka and had plans to install machinery necessary for the manufacturing of a complete line of woolen products.

Mrs. Rogers said prominent farmers in the Ponoka district were directors in the company.—Calgary Alberta

INTRODUCE MERCY DEATH BILL LONDON—A "mercy death" bill

to permit medical men to kill incurable patients was introduced in parliament Wednesday.

It was presented by Lord Ponsonby, claiming a year's campaign by many medical men and churchmen for euthanasia—their term for "easy death."

It would enable physicians and surgeons legally to put to death their patients suffering great pain from conditions diagnosed as hopeless.

For almost a year there has been growing controversy in Britain over "mercy deaths." Advocates have included some of the highest medical authorities of the realm who organized a "Euthanasia Society."

CATCHES DUCKS FROZEN IN ICE

TABER—Capture of ten ducks frozen in a pond east of Taber is reported by a local youth. The lad, residing near the lake, noticed the ducks dotted the ice, and investigating, found them alive and apparently healthy, but frozen in. They had apparently been sleeping on the water when the surface froze.

"I just walked out on the ice and picked them up," he said. Some had come loose and were on the shore. I had to run to after them. They had ice on their wings and could not fly. There are still some on the lake and I'm going to try and get them."

GARRETT NEWS

Bob Levins has rented his farm to Mr. Andy Barnes and expects to leave shortly for Vancouver where he will spend the winter.

The dance at Garrett school on Friday night was very well attended due to lack of advertising. Use Chronicle ad for better results G.F.A.A. (Well done correspondent).

Messrs. Wm. and Rob Levins were Calgary visitors last Saturday. While in Calgary Bob sold his Ford V-8.

Mr. and Mrs. A. Barnes moved to the R. Levins farm last week.

Mr. and Mrs. L. Abram left Monday for California where they will holiday during the winter months. In their absence Frank Woods will look after the farm.

CARBON STAMPEDE TO BE HELD NEXT YEAR ON WED. JUNE 30 MEETING DECIDES

J. A. Hudson Appointed Delegate To Association Meeting

TO REPAIR GROUNDS

A meeting of the Carbon Stampede Association was held last Wednesday in the Municipal office with president H. McNaughton in the chair.

The treasurer's report was read and approved, showing the sum of \$59.95 on hand with all bills paid—including the material and building of corals.

It was decided to retain the membership in the Alberta Stampede Association and to send a delegate to the annual meeting, Mr. J. A. Hudson was selected as delegate.

The dates of the annual Stampede were discussed and finally June 30 was selected as the date on which Carbon will hold its stampede this year.

The matter of improving the grounds was discussed and the executive committee was empowered to spend up to \$30 to improve the grounds as they saw fit.

HIGH SCHOOL PUPILS HAVE FINE PARTY

The High School pupils of Carbon put on a party in the school on Friday November 6. The party was well attended, and a successful program, along with a few games, was enjoyed by everyone. The program was as follows:

Egg contest, won by Stella Dodyk and Rev. S. Evans.

Solo, by Miss Stella Dodyk.

Recitation, "Don't," by Miss Marjorie Martin.

Solo, "Just a song at twilight," by Miss H. Bell.

Reading, "Telephone Conversation," by Sammy Mallon.

Piano solo, by Miss Elaine Torrance.

Reading, "Young man waiting," by Hugh Cameron.

Solo, "Have a smile," by Miss Stella Dodyk.

Humorous skit by Miss Lily Kapanak and Hugh Cameron.

Duet, by Betty MacQuade and Miss Elaine Torrance.

Reading, "Willie Won," by Sammy Mallon.

Name contest won by Bill Cameron and after the program songs were sung by all those present and then lunch was served. Dancing followed and the evening was brought to a close with "God Save the King."

During the winter months, in their absence Frank Woods will look after the farm.

ANGLICAN W. A. HOLD MEETING

The Anglican W. A. held their monthly meeting at the home of Mrs. John Atkinson Sr. on Wednesday, November 4, ten members took part. The main business was about a tea and sale of work, and it was decided to hold the sale during this month. Other business was discussed and the meeting was brought to a close. Lunch was then served.

ENTERTAINMENT AT WEST CARBON MINE

A party was held at the West Carbon hall on Wednesday, November 4, in honor of Miss Nellie Maloney and Nick Zalaski, whose marriage took place on Sunday, November 8. The party began with several tables of whist, Mrs. H. McCreedy winning the ladies' prize and George Ives winning the men's prize.

Following the whist, dance was started, the music being supplied by Harry Hunt, George Ives and Johnny Gregg, and continued until midnight. Lunch was served, and then the young couple were presented with a lovely set of dinner dishes. The couple thanked those present for the gift and dancing was then resumed. The party broke up at one o'clock.

LONG YEARS AGO

Harry Brown is the happy owner of a DeLoe Light plant. Harry Thornburn's pool is also lighted with a DeLoe, both plants bought from Farmers' Exchange.

Messrs. L. B. Hart, Chas. Bruels and John Clayton were in the city this week.

At a meeting of the Curling Club last Thursday S.C. Burnett was elected president; W. Leitch, vice-president; and H.A. Evans, secretary-treasurer. The building committee is composed of J. B. Ramsay, H.N. Elliot, and J.J. Greenan.

WEDDINGS

ZALASKI—MALONEY

A wedding of considerable interest to some of the Peleees. Miss folks took place at St. Gabriel's church on Sunday afternoon, November 8, when Miss Nellie Maloney, of Calgary, became the bride of Mr. Nick Zalaski, of Carbon. Father Kien, of Rockyford, officiated.

Following the ceremony, a wedding feast was held at the home of Mr. and Mrs. J. Kooli, and many friends and relatives were present. After the dinner a wedding dance was held in the Peleees Hall.

The happy young couple will reside at West Carbon. Mr. Zalaski being employed at the Peleees Carbon Collieries.

THE WORLD OF WHEAT

The 250 million bushels of wheat which Canada hopes to export annually has to compete on the markets of the world with a vast quantity of other foodstuffs.

It is calculated that the 2,000 million people in the world consume each year in round numbers foodstuffs as follows: Potatoes 8,000 million bushels, wheat 5,000 million, rice 5,000 million, rye, millet and spelt together 1,200 million.

In addition 10,500 million bushels of corn, barley, oats and mixed grains are fed to livestock and produce the equivalent of about 2,000 million bushels of livestock products such as meat, eggs, butter, cheese, milk and cream.

Then there are consumed either directly or through livestock large amounts of beans, peas, lentils, rapeseed, ground nuts, linseed, sesame, cotton seed, hemp seed, copra, palm kernels, fish, game, vegetables, fruit and pasture grasses.

Or, it means that on the average each person in the world consumes annually the following: Potatoes 4 bushels, wheat 2.8 bushels, rice 2.8 bushels, rye, millet and spelt 1 bushel, livestock products 1.1 bushels, fish,

AMENDMENT TO MUN. ACT PROVIDES FOR TERMS OF OFFICE FOR EACH DIVISION

Council Asks that District be Placed in Drought Area

EMERGENT MEETING

The regular monthly meeting of the Council of the Municipal District of Carbon was held in Carbon on Tuesday November 3rd with councillors C.B. Gwyn, J.J. O'Hanlon, Harold O'Neil and H.H. Crowell present.

A communication was read from the Department of Municipal Affairs outlining a recent amendment to the Municipal Districts Act which provides for terms of office of councillors. In accordance with data furnished the following shall be the term of office for the present council:

In Divisions two and three, the term expires in February 1937.

In Divisions one and four the term expires in February 1938.

In Divisions five and six the term expires in February 1939.

The Municipal District convention in Calgary on November 18, 19 and 20 was dealt with and Messrs. J. B. McEwan and H. O'Neil were elected to represent the Municipal District of Carbon.

Owing to the severe hail damage in parts of the municipality the council thought it would be advisable to try and have this district placed with those in the drought areas for the year 1937, so that farmers could receive free freight, etc., and the council is doing its utmost to have this matter settled as quickly as possible.

Under the tax consolidation Act arrears on taxes are to be paid each year, but owing to the hail damage the council agreed that persons suffering loss of crop would have their payments extended for an extra year providing they pay the current taxes. It was decided by the council to gravel the hill leading north from Hesketh.

The date of the general meeting of the Municipal District of Carbon was set for February 29, 1937 and the following appointments were made: L. B. Hart, Returning Officer; Julius O'Hanlon and John Atkinson, Returning Officers for Division 2; L. B. Brown, Deputy-Returning Officer for Division 3.

An emergency meeting of the council of the Municipal District of Carbon was held on Monday, November 9, and by-laws were passed providing for feed relief and seed relief, and same are to be forwarded to the government for consideration.

game and vegetables, fruits and other cereals 3 bushels, making a total of 14.3 bushels of foodstuffs each person consumes per annum, of which it will be noted that wheat forms one fifth.

Factors that have tended to raise prices have been: Poor prospects in Australia—Italy purchasing Argentine wheat heavily—Severe lack of soil moisture in U.S.A., northwest and western Canada—Price of gold advancing—Japanese wheat crop estimates lower—Increase in Argentine feed acreage—Sale of diamonds from South Africa increasing considerably. Prices have been pushed down by: Beneficial rains in Argentina—Large wheat exports from Balkans, Persia and Hemispheres, India, Persia and Sweden—U.S. winter wheat crop very promising—Argentina further devalues currency—Seasonable crop weather in Europe—Exports of corn and pork from Rhodesia increasing.

\$500,000 A DAY

Every business day last year policyholders beneficiaries of life insurance companies operating in Canada received over half-a-million dollars. Seventy-five per cent of this money went to living persons.

There could be no more striking indication of the democratic character of the Dominion half of the world for reaching influence of this, the greatest co-operative business of the Dominion. It represents 3,500,000 men and women—half the adult population of the Dominion—half the electorate, federal and provincial.

Through their hard-earned savings Canadian life insurance policyholders and beneficiaries have created an estate of over six billion dollars and

C. G. L. T. ECHOES

Monday evening, November 9, in the annex of the United Church, twenty-nine C.G.L.T. members of the three different groups met in a joint body to observe Armistice.

Mrs. C. O'Neil, Miss R. Embree and Miss H. Bell, leaders of the organization conducted a devotional program with responses given by the girls and readings presented by Margaret MacGregor, Zena Trumbley, Jessie Sherry and Marjorie Leitch. All readings were in keeping with the spirit of Remembrance Day—pledging for peace.

The main feature of the evening was a most interesting talk on "Peace" given by Rev. W.H. MacDonald, B.A. B.D.

Appropriate songs as played by the pianist, Fred Brunner, were sung. The meeting was closed with the singing of "Taps."

ANNUAL MEETING OF THE CARBON CURLING CLUB ON TUESDAY; ELECT OFFICERS

Large Number of Enthusiastic Curlers Attend

FEES LOWERED

The annual meeting of the Carbon Curling Club was held in the Municipal office on Tuesday night of this week and a large number of enthusiastic curlers was on hand.

Election of officers was one of the main items on the business program, resulting as follows:

Hon. Pres., Rev. Wm. McNichol.

President, Jas. Fries.

Vice-Pres., Fred Bessant.

Secretary, L. Poxon.

Chaplain, Rev. MacDonald.

Executive Committee: Messrs. A.F. McKibbin, Sandy Reid, F. Barker, G. Dishaw and C.L. MacGregor.

Stan Torrance was appointed ice committee, with power to add to the committee.

The treasurer's report was read and found very favorable. The building is practically free of debt and the club is in the best financial position since its re-organization in 1927.

Fees for curling this year are the lowest in history, being set at \$5.00 per member for the season. With such a low membership it is hoped to get a large membership with many new curlers.

have assets invested in the Dominion of £200 million. These funds, invested in bonds and mortgages in every province and municipality in Canada, promote national development, provide employment throughout the Dominion, help homes and farms, and bring the business to the general store and country merchant.

The Wheat Problem

What to do about wheat is the greatest power facing the Western Canadian farmer, not only for the immediate present, but for the long range future. Should he grow more, or should he grow less, or perchance, should he forget about wheat and turn his attention to other crops and other activities?

It is safe to say that this problem causes more sleepless nights on the Western Canadian prairie than anything else. It is probable that far more the truth to say that the question is uppermost in the mind of the average tiller of the soil the greater part of his waking hours and that during the night it perturbs his slumbers.

The farmer seeking the solution of the problem can get plenty of data which has a bearing on the subject and a plethora of advice without going far afield for it, but unfortunately for him and for his peace of mind so many complications are involved in the answer to the question and so many, so diverse and contradictory are the replies that the greater his research, the greater must be his confusion and the farther he is away from a conclusive solution.

To solve the problem with even a remote degree of assurance, the interrogator must not only be in possession of an immense amount of current available information but he must also be something of a prophet. He must be able to peer into the crystal of the future and divine what is ahead.

As there are no infallible methods of determining the unknown factors of production and marketing he must make his guess as best he can and shape his course accordingly.

If he guesses right and successfully runs the gamut of early and late frosts, gashoppers, wire worms, cutworms, thistles and other noxious weeds, winterwinds and hail, rust and other blights and pulls off a crop, he is faced with the possibility that it may be a drag on the market and that the reward of his labors may be little better than zero.

Added to all these and many other unrecorded uncertainties and handicaps comes a new threat to the existence of cereal farming as it is practiced on the prairies in the form of grain produced on an intensive scale under factory conditions and without the use of soil as a medium, a method discovered by two Englishmen after four and a half years of research and now being tested on a commercial basis.

To quote a Magazine Digest summary of an article appearing in the Sunday Express of London, "the inventors claim that under their scheme which they call 'cabinet culture,' one acre of floor space is equal to 1,760 acres of grass land; aspeny-wind of seed will grow 200 hundredweight of green fodder; one crop of fodder can be produced per day instead of one per year; a farmer feeding intensively cultivated corn instead of hay and grass to his livestock will save \$2.50 on every pig brought to bacon weight, \$5 on every bullock, and from 15 to 20 per cent. on milk production because they will be eating young, fresh food instead of old or dried grass which has been weakened of its vitamins."

"The inside of the cabinet contains rows of trays, each one with corn in a different stage of growth. To-day's tray holds seed. Yesterday's shows the white shoots. The shoots are larger and larger up to the tenth day when the fodder is full grown and ready to be taken out and eaten."

"There is no soil. On top of the cabinet is a tank full of water containing a small proportion of a chemical solution. The chemicals are those of which the soil consists. Enough solution to last a month costs \$3.75."

"In the bottom of the tank are small holes. For three minutes every 24 hours a tap is turned on and the tank drops 'rain' on to the top layer of trays. By the tenth day the growth can be lifted out of the tray like a grass-grown mat. The animals eat every scrap of it and the tray is left perfectly clean. There is no earth or dirt of any kind in the whole process."

"Animals fed on these intensive crops can be kept in yards or barns." It is reported that already efforts are being made to establish an agency and import some of these "factory-farms" to Western Canada.

If the inventors' claims for this method of growing crops can be demonstrated as commercially feasible and economical no doubt the next step will be to improve the system to enable it to bring wheat to maturity, and if that can be done with success one wonders what will happen to the wide expanse of grain fields which constitute such a large section of the prairie provinces and what will happen to the investment in capital and labor which the farmers have sunk in hundreds of thousands of acres.

There is just one consolation for the prairie farmer and that is the fact that the scheme has not been proven a commercial possibility. Quot exact demonstration.

Rice, milk sales in Japan show a decline. The mushroom is very sensitive to large increase compared with last changes of temperature and to moisture.

More Bread—and Better Bread and Better Pastry, Too

Man With Dual Brain

Can Do Two Entirely Different Things At Once

There is a man in Sydney, N.S.W., who can do two entirely different things at once, and do them well. He is Ritting Wilkison, known to his friends as the man with the "dual brain."

Among other accomplishments, he can write different words and sentences simultaneously with both hands. He can write the same word backwards. He can also do two separate drawings at the same time. As a bookkeeper he will be particularly well equipped as he can make simultaneous entries—the figures with one hand and the items with the other.

Wilkison says that he was born that way. As a child, he found that he was writing backwards with his left hand—to the discomfort of his teachers, who had to use a mirror to read his writing. Specialists who examined him, decided that he had a disease of the brain. To induce correct writing with the right hand, they strapped his left arm to his body.

When he entered college, he jealously guarded his secret. After a time, he committed some misdeeds and was given 100 lines to write. By using both hands at once he completed the task in half the time taken by the other boys. The astonished master accused him of having another boy to help him, but then Wilkison had to explain his teachers, who had to use a mirror to read his writing. Specialists who examined him, decided that he had a disease of the brain. To induce correct writing with the right hand, they strapped his left arm to his body.

Cause Of Cataracts Unknown

Certain Food Extracts Said To Have Effect On Eye Malady

The cause of cataracts, which has baffled the medical world for centuries, was believed to be a step nearer solution with the discovery by Dr. Agnes Fay Morgan, chairman of the department of household science at the University of California, and Bessie B. Cook, a graduate student, that certain food extracts have a material effect on the eye malady.

In a report to the society for experimental biology, Dr. Morgan said her experiments showed that presence of lactose or galactose in the intestine, and frequent gastro-intestinal absorption difficulties associated with a deficiency of vitamin G offer a possible common attack on the problem.

"In lactose and low vitamin G tests, there was a hundred per cent. incidence of cataracts," the report said. "Likewise the lactose fed controls grew at about 60 per cent of a group of cornstarch fed controls."

Dr. Morgan said the cause of cataracts is still unknown but that the determination of the cause has moved a step in advance in the possible future prevention of the disorder.

Girl Pat Escapade

Skipper And His Brother Convicted In Old Bailey Court

George Osborne, skipper of the wandering trawler, Girl Pat, and his brother, James, were convicted in Old Bailey court in London of theft of the vessel. George was sentenced to 18 months in prison and James, formerly of Toronto, to 12 months.

The Girl Pat put out from Grimsby last April, ostensibly on a fishing expedition. She put in along the Spanish coast, at the Canary Islands and in West Africa. She was next reported off French Guinea and finally was captured in June off British Guinea.

World's Dairy Congress

Will Be Held In Berlin, Germany, Next August

Canada will be officially represented at the 11th World's Dairy Congress to be held in Berlin, Germany, from August 22 to 28, 1937. This congress, which meets every three years, is the most important gathering of representatives of the dairy industry in the world. An international dairy exhibition will also be held in connection with the congress at which the very latest developments in the dairy industry throughout the world will be shown.

Home Improvement Plan

Unemployed Building Trades Workers Can Look About For Work

The government's new home improvement plan will give the unemployed building trades workers a chance to approach his problem of finding a job in an entirely new way. It was stated at the national employment commission.

The commission suggested out-of-work members of building trades unions can now look about their firm homes in need of repairs, estimate the cost of making improvements and tell the owner how much money he needs and how he can get it. In the case of farmers, there is nothing to prevent them borrowing money to buy materials and doing the work themselves.

Under the regulations, money will be loaned on the basis of character and income. A farmer who can fulfill these requirements to the satisfaction of his bank manager will be in a position to borrow money for the purchase of materials no matter whether he does the work himself or hires labor to do it. While the home improvement plan is basically designed to provide employment, the purchase of materials by the farmer, even if he does the work himself, it is considered by the commission, accomplish this purpose.

Ancient Rome's famous Baths of Diocletian could accommodate 3,200 bathers at one time.

Long Patrol Ends

Ship That Guides Navigation Through Northern Channels, Completes Work For Season

The N. B. McLean, amphibious ice-breaker which guides navigation through channels leading to Canada's most northerly seaport of Churchill, slipped quietly into harbor at Quebec recently, completing her seasonal patrol of the northern seas.

For almost three and a half months she plowed the Hudson Straits, guiding 15 vessels through the narrows, to and from the Manitoba port. During that time she saw one wreck; saw the freighter Avon River, disabled in a gale, washed ashore. The storm, last September, raged for three days and the McLean stood by the helpless grain carrier 48 hours before attempting to rescue the crew and later place them aboard the steamship Fibby.

From remote points in the north, the McLean brought back eight wireless operators, stationed for a year at their lonely outposts.

The ice also brought back Gabriel Bohart, 23-year-old boatsteward from the Charles L.D., stricken by appendicitis as the French freighter made her way up the straits.

The French seaman was brought aboard the McLean, and Dr. Fernand Liotte performed an emergency operation in his cabin.

The patient was reported recovered and it was expected he would leave shortly for France.

At lonely Stukut harbor, in the straits, the McLean put in to provide medical treatment for more than a score of Eskimos, stricken by influenza. Four of the group died before the vessel arrived, but Dr. Liotte reported recovery of the others after medical treatment.

World Jewish Problem

The Jewish Population Of Poland Is 3,500,000

The world Jewish problem took on new complications at Geneva with a Polish demand that the League of Nations find a home somewhere else for the Polish Jews.

M. Komarnicki, the Polish delegate, told the League assembly's political committee that while Palestine was the natural and principal home for the Jews, other places must be found as an asylum for the "immense reservoir of Jewish population inhabiting Central and Eastern Europe."

The Jewish population of Poland is 3,500,000.

The government moved at Jerusalem to end sabotage by arresting 36 Arabs and accusing 15 more of damaging the Iraq Petroleum Company pipeline. Brigands have in the past continually destroyed sections of the pipeline and fired the escaping oil.

SELECTED RECIPES

MAGIC CREAM COOKIES

- 2 eggs
- 1 cup sugar
- 1 cup thick cream
- 3 cups flour
- 1/2 cup shredded coconut
- 2 teaspoons Magic Baking Powder
- 1/2 teaspoon salt

Beat eggs until light, add sugar gradually; add coconut, cream, and flour (which has been mixed and sifted with baking powder and salt). Put away in ice box until thoroughly chilled, then turn on to a floured board and roll one half inch thick. Sprinkle with coconut and roll one fourth inch thick; cut with a small cutter, first dipped in flour. Bake on a buttered sheet in a moderate oven.

If You Have a Child

ASK YOUR DOCTOR THIS

Ask Him Before Giving Your Child an Unknown Remedy

Practically any doctor you ask will agree: "Don't give your child unknown remedies without asking your doctor first."

When it comes to the widely used children's remedy—"milk of magnesia," the standard of the world is established. For over half a century many doctors have said "PHILLIPS' Milk of Magnesia." No other is "quite like it."

Keep this in mind, and say "PHILLIPS' MILK OF MAGNESIA" when you buy. Now also label them when you give your child an unknown remedy without asking your doctor first.

Also in tablet form: "Tack up" tablets to the right side of a teaspoonful of milk.

MADE IN CANADA

PHILLIPS' MILK OF MAGNESIA

Relief Running Wild

Town In Eastern Ontario Has Grant Heavily Reduced

Provincial relief grants to the town of Hawkesbury, in eastern Ontario, will be reduced nearly \$8,500, because investigation of relief administration had shown "another municipality squandering provincial funds on unneeded assistance." Welfare Minister Croft announced.

"The town seems to have been running wild in relief administration in the easy confidence we'd foot the bills," he said. "They're in for a jolt. Every mispent cent will be charged back to their own taxpayers."

Some relief recipients were driving their own cars, the minister said.

An investigation found people operating their own businesses on relief, offering unfair competition to rivals. Investigators found a number of instances where people closed out bank accounts to go on relief.

LICENSED AUCTIONEER

S. F. TORRANCE, Clerk. Phone: 5

TOWN & COUNTY Personalographs

Neil Fuller had the misfortune to
break several bones in his left foot
last Saturday when a horse fell on it.
Neil is around on crutches now.

Aaron Klassen motored to Calgary
on Tuesday. He was accompanied by
Miss Ruby Embree.

Norman Ramsay left last Wednes-
day for East Coode where he has
secured a position at the Murray mine.

Garnet Snell returned last Wednes-
day from a few weeks visit with re-
latives in Eastern Canada.

Mr. and Mrs. J. J. Greenan, Mrs.
Hugh Brown and Mrs. S. J. Garrett
motored to Calgary last Friday.

Saturday was pay day at the mines
and with steady work the miners all
drew large checks. Business was good
in town as a result.

Mr. and Mrs. E. J. Rydman, Mr. and
Mrs. H. R. Davidson, Mrs. C. Olliphant
and Miss Isabel McGregor motored to
Calgary last Saturday.

Mr. and Mrs. R. J. Fairbairn of
Calgary spent a few hours in Carbon
on Wednesday of this week.

Sydney Wright is having a cellar
dig to the north of the Dishaw resi-
dence and will move his house to this
location.

Jack Mathers, Norman Nash and
Miss Heber Mathers motored to Cal-
gary on Wednesday to see the Rugby
game between Regina and Calgary.

The Lady Roberts Chapter I.O.G.E.
held their annual dance in Carbon on
Wednesday evening of this week and
there was a large crowd present. As
a result of the undertaking the Chap-
ter will clear around \$30. In the draw
at midnight, Mr. Chas. Paine, of Cal-
gary, won the side rule, and Mrs. C.
Prisen won the cushion.

Miss Annie Klassen of Bowden ar-
rived on Sunday and is visiting with
her brother and sister-in-law, Mr. and
Mrs. Aaron Klassen.

Mr. and Mrs. Dick Gimbel spent
Wednesday in Calgary attending the
celebration of the golden wedding an-
niversary of Mr. Gimbel's parents.

Wednesday was a holiday in town
and all places of business were closed.
As a result this issue of The Chron-
icle if about two hours late.

Mary Flaws and Shirley Brown
have contracted the measles, although
only in a mild form.

The weather has been mild the past
few days. Last Wednesday and Thurs-
day nights the temperatures dropped to
around 20 degrees below zero. On
Saturday the weather warmed up and
since then Chinook winds have taken
all the snow and we have been enjoy-
ing spring-like days.

Mr. Hermanson, miner at the Peer-
less Carbon Collieries was taken to
the Drumheller hospital on Tuesday,
suffering from double pneumonia.

Frank Sherry spent Tuesday in Car-
bon with his family.

Geo. F. Tutt of Swallowell died at
his home on Tuesday afternoon from
a heart ailment, according to word
received in Carbon on Tuesday even-
ing.

A meeting of all interested in the
sport of hockey will be held in the
Municipal office on Monday evening,
November 16th, at 8 o'clock. It is
planned to re-organize hockey in Car-
bon this winter and a large attendance
is requested.

For the dry-cleaning of textile ma-
terials as well as for the degreasing
of metals of two new, non-inflammable
chemicals are now being made
in Canada. Used in special machines,
they create a vapour which extracts
all dirt and grease without harming
the material being cleaned and with-
out leaving any after odour. The use
of these chemicals in hundreds and
in the heavy metal industries in in-
terestingly described in the October
issue of The C-I-L Oval.

Remodel, Renovate and Repair your Home!

Look over your house as a guest
would look at it, note what is needed and do it now! You
can have the money for:

- Needed additions
- Painting, papering, decorating
- Repairing walls and ceilings
- Carpentry work
- Insulating, to make the house warmer in winter, cooler in summer
- Installing better bathroom and other fixtures
- Installing correct and more convenient electrical fixtures
- Repairing roof and rain pipes
- General repairs.

The Bank of Montreal is co-operating with the Government
by making loans, repayable on easy terms, for repairs and
renovation of homes under the Dominion Home Improve-
ment Plan. We would welcome a call from any home owner
desiring funds for such work.

"a bank where small
accounts are welcome"

BANK OF MONTREAL

Carbon Branch: C. L. MacGREGOR, Manager

MODERN, EXPERIENCED BANKING SERVICE THE OUTCOME OF 119 YEARS SUCCESSFUL OPERATION

A little girl sitting in church watch-
ing a wedding suddenly exclaimed:
"Mummy, has the lady changed her
mind?"
"What do you mean?" the mother
asked.
"Why," replied the child, "she went
up the aisle with one man and came
back with another."

HAVE YOU G'AUTUMN

Buy your autumn coats,
If you haven't already b'autumn
And avoid those autumn colds,
If you haven't c'autumn.

1st Belle: "That man who's going
to marry Betty has money to burn."
2nd Belle: "Well, he's met h's
match."

There are no song birds in pine for-
ests. The oil in the pine needles kill
the insects and worms that song birds
thrive on.
